## **DETAILED ACTION**

### ***Drawings***

1. The drawings were received on 3 August 2006. These drawings are acceptable.

### ***Specification***

2. The changes entered to the specification in the Amendment filed 3 August 2006 fully correct the deficiencies objected to by the examiner in the previous Office action.

### ***Response to Arguments***

3. The cancellation of claims 1-44 is noted.
4. Grounds of support for newly entered claims 45-66 can be found within the original Specification filed 15 October 2003 as outlined on pages 18 and 19 of the Amendment filed 3 August 2006. No new matter is considered to have been added through these claims.

### ***Allowable Subject Matter***

5. Claims 45-66 are allowed.
6. The following is an examiner's statement of reasons for allowance:

In the independent claims 45, 54 and 60 of the instant application, the step of actively determining that the signal from the second electrode contains an artifact and blanking the second channel only when an artifact is detected appears to be a uniquely inventive step. Fischell et al. (US Patent 6,016,449) and Pless (US Patent 6,466,822),

Art Unit: 3762

considered to be the most pertinent art of record, merely blank the sensing channel every time that a stimulation pulse is delivered which, while passively negating signal artifacts in the instances where they do arise, lacks the critical step of actively determining the presence of an artifact post-stimulation as provided for in the instant claims. It is understood that the automatic blanking of Fischell et al. and Pless is provided to avoid overpowering the sensing circuitry rather than to necessarily avoid recording of artifact signals. Because the claims of the instant application require determination of an artifact signal before any blanking is initiated, and the sensing channel will therefore remain active even post-stimulation should no artifacts be detected, the instant application is found to be patentably distinct from the most pertinent prior art of record as disclosed in Fischell et al. and Pless. Allowability of the dependent claims follows from the allowability of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
